N. 2 CRANES AVAILABLE

## GROVE RT550E

|                     |      |
|---------------------|------|
| Lifting Capacity:   | 45 T |
| Year of Production: | 2014 |
| Boom Length:        | 39 m |

## GROVE RT540E

|                     |      |
|---------------------|------|
| Lifting Capacity:   | 35 T |
| Year of Production: | 2008 |
| Boom Length:        | 31 m |

## GROVE RT530E

|                     |      |
|---------------------|------|
| Lifting Capacity:   | 30 T |
| Year of Production: | 2006 |
| Boom Length:        | 29 m |

## TEREX RT45

|                     |        |
|---------------------|--------|
| Lifting Capacity:   | 45 T   |
| Year of Production: | 2018   |
| Boom Length:        | 31,1 m |

## LOCATELLI GRIL 52.47

|                     |      |
|---------------------|------|
| Lifting Capacity:   | 47 T |
| Year of Production: | 2022 |
| Boom Length:        | 32 m |

## LOCATELLI GRIL 830

|                     |        |
|---------------------|--------|
| Lifting Capacity:   | 30 T   |
| Year of Production: | 2005   |
| Boom Length:        | 24,5 m |

## LOCATELLI GRIL 8500<sub>TL</sub>

ifting Capacity:  
Year of Production:  
Boom Length:

50 T  
2016  
37,2 m

# MOBILE CRANES & LIFTING SOLUTIONS

ORMIG was founded in 1949 by Guido Testore, who intuited in the first post-war period that Italy needed means to restart the production and the crane truck, already present in the United States but almost unknown in Europe, could have become a vehicle of great diffusion. A small group of specialized technicians managed to transform a work force that was purely dedicated to agriculture, into highly professional metalworkers, able to build a product that, exported all over the world, was a source of pride for Italian industry.

Locatelli Crane S.r.l. is the first totally Italian company that deals with the construction of hydraulic cranes, specialised in the production of off-road cranes measuring from 12.5 t up to 80 t and a 20t multi-road. The success of Locatelli Crane hydraulic cranes is based on their reliability, high level of performance and low operating costs, thanks to the high quality of the components and the long experience in manufacturing this type of machinery.

GALIZIA is an Italian company that designs, manufactures and markets electric self-propelled cranes, diesel and electric industrial telehandlers. The design phase is developed by a team of engineers and technicians, who make use of calculations and drawings by modern software. The production phase is entirely carried out within its own carpentry, mechanical processing and assembly departments by highly qualified staff.

DELTA CRANES is an important Italian group which designs and manufactures industrial electric pick & carry cranes. The high quality of the components, along with the longstanding experience of the staff, make DELTA CRANES machinery intuitive, functional and efficient, with particular care to the environment and the operators' safety. Moreover, the wide range of products makes them suitable for all lifting needs, from heavy loads to light handling.

We offer a "long term rental" service, with or without operator.  
Contact us for more information.

## COMPONENTS and SYSTEM for INDUSTRIAL and COMMERCIAL VEHICLES

SI PARTS S.r.l. is a partner of the COBO GROUP, a leader in the design and sale of accessories for off-highway vehicles.

Recognized worldwide for the high-quality standard of its products in its catalogue, COBO entrusts SI PARTS for the B2B sales of the broad range of original items intended for spare parts dealers, mechanics, companies with a fleet of company vehicles.
